INTRODUCE ABOUT ME

I am an Informatics Engineering student with a strong interest in the field of Information Technology. My curiosity about how computers work started at an early age, which led me to explore both the software and hardware aspects of computer systems. As I grew older, I began learning various programming languages and web technologies, which strengthened my interest in software development. Through my academic projects and professional experiences, I have developed practical skills in backend development, database management, and API development, and I continue to expand my knowledge by building real-world projects and collaborating in team-based environments.

PERSONAL PROJECT

As part of my undergraduate thesis project, I developed the backend system for ANJELIKA, an application designed to support a maternity transportation service that helps pregnant women access healthcare facilities. In this project, I focused on backend development using Node.js, Express.js, and MySQL, where I designed the database structure and implemented 32 RESTful API endpoints to handle core system functionalities such as user management, booking requests, and driver assignments. I also applied concepts such as CRUD operations and relational database design to ensure structured data management within the system, which consisted of 5 main database tables. To ensure the reliability of the backend system, I conducted API testing using Postman to validate request handling and server responses across all endpoints. Through this project, I gained practical experience in backend architecture design, API development, and database management in a real-world system scenario.

```
12 // === AUTH ROUTES ===
13 router.post('/auth/register/ibu', ibuController.registerIbu);
14 router.post('/auth/register/driver', driverController.registerDriver);
15 router.post('/auth/login', authController.login);
16 router.post('/auth/logout', authController.logout);
17
18 // === ADMIN ROUTES ===
19 router.post('/admin/register/ibu', verifySession, allowRoles('admin'), adminController.registerIbuBy);
20 router.post('/admin/register/driver', verifySession, allowRoles('admin'), adminController.registerDr);
21
22 router.get('/admin/users', verifySession, allowRoles('admin'), adminController.getAllUsers);
23 router.get('/admin/users/pending', verifySession, allowRoles('admin'), adminController.getPendingUser);
24 router.get('/admin/users/:id', verifySession, allowRoles('admin'), adminController.getUserById);
25 router.get('/admin/users/role/:role', verifySession, allowRoles('admin'), adminController.getUsersBy);
26
27 router.patch('/admin/users/:id', verifySession, allowRoles('admin'), adminController.updateUserById);
28 router.patch('/admin/users/:id/approve', verifySession, allowRoles('admin'), adminController.approve);
29 router.patch('/admin/users/:id/reject', verifySession, allowRoles('admin'), adminController.rejectUse);
30
31 router.delete('/admin/users/:id', verifySession, allowRoles('admin'), adminController.deleteUser);
32 router.delete('/admin/users/', verifySession, allowRoles('admin'), adminController.deleteAllUsers);
33
34 // Admin Direct Routes
35 router.get('/admin/directs', verifySession, allowRoles('admin'), adminController.getAllDirects);
36 router.get('/admin/direct/:id', verifySession, allowRoles('admin'), adminController.getDetailDirect);
37 router.patch('/admin/direct/:id/verify', verifySession, allowRoles('admin'), adminController.verifyCc);
38 router.delete('/admin/direct/:id', verifySession, allowRoles('admin'), adminController.cancelDirect);
39
40 // === DRIVER ROUTES ===
41 router.get('/driver/profile', verifySession, allowRoles('driver'), driverController.getProfileDriver);
42 router.patch('/driver/profile', verifySession, allowRoles('driver'), driverController.updateProfileDr);
43
44 // Driver Direct Routes

PERSONAL EXPERIENCE

During my internship as a Coding Instructor at Timedoor Academy Cibubur, I taught and assisted 35 students in learning programming fundamentals and developing coding projects across different learning levels. I delivered lessons in technologies such as HTML, CSS, JavaScript, React Native, Scratch, and Kodu through the Cibubur Adaptive Class program. In addition to teaching, I regularly prepared learning materials and technical equipment including laptops, robotics tools, and AR/VR devices to support classroom activities. I also conducted self-learning through the Timedoor LMS to deepen my understanding of the curriculum and created progress reports to monitor students development and evaluate their learning outcomes.

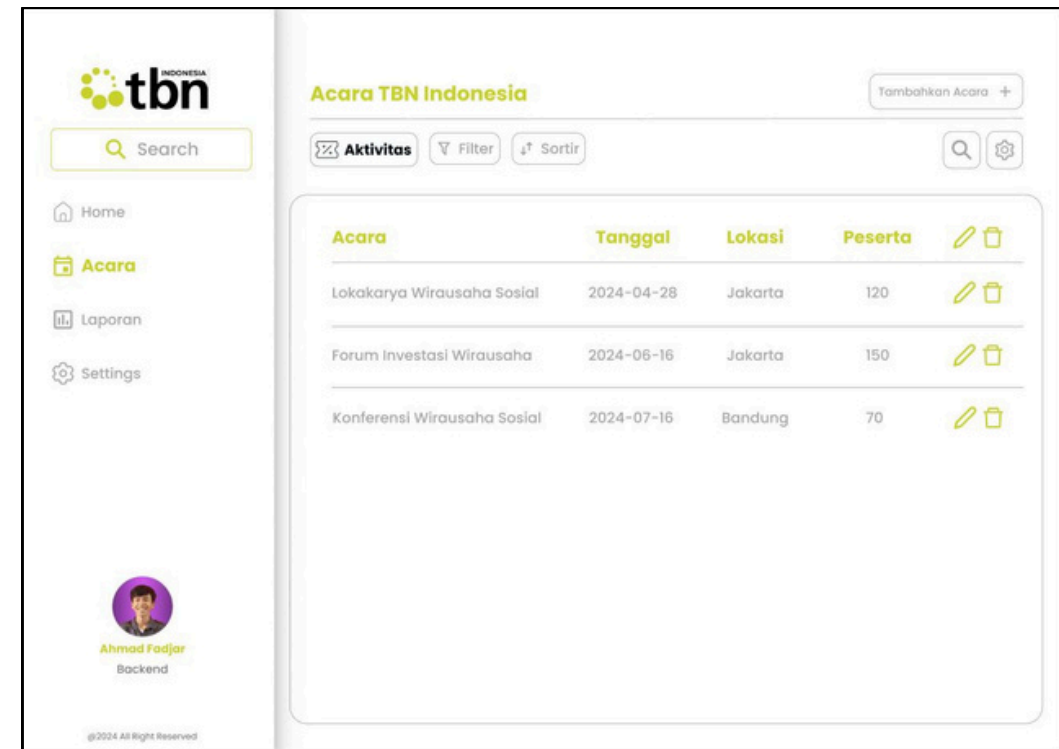

CERTIFICATE OF TIMEDOOR ACADEMY

PERSONAL EXPERIENCE

I participated in the MSIB Independent Study Program at Maxy Academy for four months, focusing on backend development. During the program, I learned and applied backend technologies such as PHP, SQL, and Node.js to build and manage server-side functionalities. As part of the program, my team worked on a hackathon case study organized by Maxy Academy in collaboration with TBN Indonesia, where I was responsible for developing the backend components, including designing the database structure and implementing core server-side functions for the website. Through this project, I gained hands-on experience in backend system development, database management, and collaborative problem solving. Our team successfully achieved the Best Team award in the hackathon for delivering one of the most effective solutions.

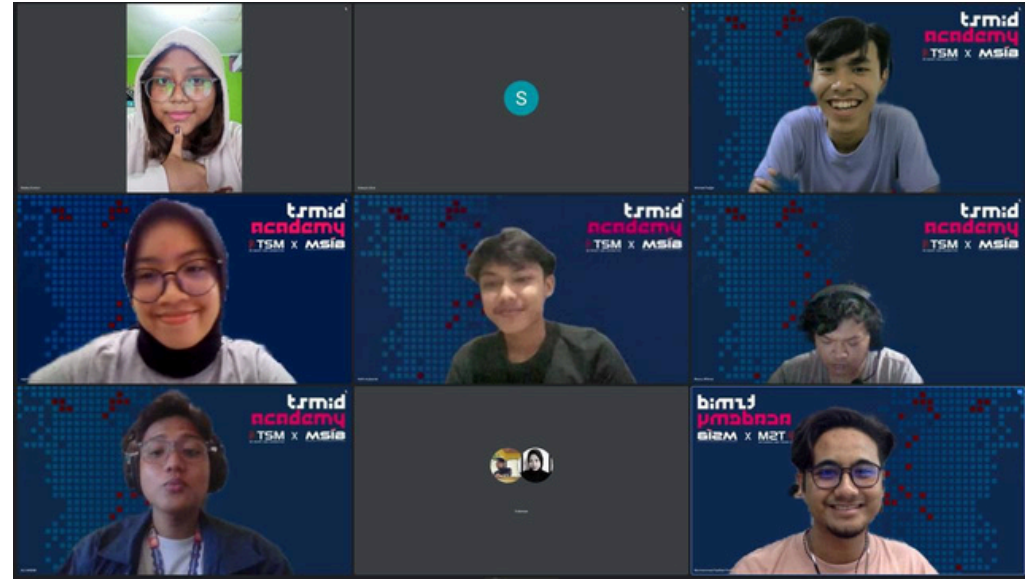

CERTIFICATE OF MAXXY ACADEMY

PERSONAL EXPERIENCE

I participated in a Virtual Internship program at TSM.id, where I worked with a team to develop a web-based inventory management application. In this project, I contributed as part of the backend development team, focusing on implementing server-side functions and designing the database structure to support the system's inventory management features. Through this experience, I gained practical exposure to collaborative software development in a remote working environment, where our team coordinated tasks and discussed system workflows using FigJam for planning and collaboration.

CERTIFICATE OF TSM.ID

OTHER CERTIFICATES

I completed the Cloud and Web Instant training program organized by NF Computer, which introduced fundamental concepts of cloud computing and web application development. Through this program, I gained an understanding of how cloud platforms can be used to build, deploy, and manage web-based applications more efficiently, as well as the role of cloud infrastructure in modern software development.

I completed a Microsoft Office training program, where I learned to use applications such as Microsoft Word, Excel, and PowerPoint for document creation, data organization, and presentation development. This training helped me develop practical skills in managing digital documents, analyzing simple data, and preparing structured reports and presentations.

OTHER CERTIFICATES

I completed a Graphic Design training program focused on using CorelDRAW to create visual designs such as logos, banners, posters, and promotional materials. Through this training, I gained fundamental knowledge of digital design principles and developed skills in creating simple visual assets for communication and presentation purposes.

I obtained a Software Engineering Competency Certification issued in collaboration with PT Bukaka Teknik Utama Tbk as part of the vocational competency assessment during my studies in Software Engineering at vocational high school. This certification evaluated my fundamental knowledge and practical skills in software development, demonstrating my ability to apply programming concepts and technical problem-solving in real-world scenarios.
